WORK EXPERIENCE
Software Developer
MagiClick (Provides digital solutions over both development and marketing for many high-profile large
companies in Turkey) - Istanbul, TR - December 2010 to February 2012
This company provides mobile and web applications such as e-commerce, mobile, search engine
optimizations, direct banking and trading. My role was mainly on to develop fast deployable content
management systems, SQL data performances and maintain the code quality.
Software Developer
Tradesoft (Company has a major role in financial software, consultancy services, investment banking,
sectorial ITC solutions and cash register systems) - Istanbul, TR - July 2007 to September 2008
Software Developer (Back-end & Front-end)
This is a trading company operates on online shareholding systems. I worked as software developer providing
website back-end solutions for financial requirements.
Software Developer
Arti Technology (Leading Software Company provides various services and contents for over 80M users in 4
different countries) - Istanbul, TR - February 2012
This company generally focuses on mobile applications and web based projects for mobile devices. I work
as a back-end developer with front-end skills. My main tasks are about performance improvement and data
integrity.
My latest project is www.sigortam360.com, an online insurance agency that has also developed the only
database in Turkey about second-hand cars, and contains historical information about the cars like damage,
policy and insurance. My other major projects are mostly within company's framework systems.
