WORK EXPERIENCE

Software Developer
Telenor - Hyderabad, ANDHRA PRADESH, IN - July 2015 to June 2016

Description & RMS manages the core functionality of billing and revenue management.
responsibilities RMS handles the functionalities of pricing, mediation, rating, billing, Invoicing,
payments, CLM, collections, roaming, Interconnect and Bill formatting. It is
responsible for enabling functionalities that supports rating, billing and track the revenue of the customer based
on the services acquired.
Platform Java V1.7
Tools PL/SQL Developer, Eclipse, SVN, Pentaho 5.0.1
Project Material Request Workflow (MRW)

Software Developer
Qualcomm - Bangalore, Karnataka - March 2014 to June 2015

Description & The Material Request Workflow application will provide an improved user
responsibilities interface over the existing website. The users will experience a shopping cart
similar to an e-commerce website and will be able to request items of different hardware types
in the same order. The demand analysts will be able to verify whether the item requested is
valid and acceptable and accordingly, accept or reject it. The demand analysts will be able to
approve or reject by line item rather than the order as a whole.
The application will validate the items with Quantum before letting the user
add in to the shopping cart. The application will also capture and validate the Project,
Expenditure Org, Expenditure Type and Task combination wherever required thereby reducing
the room for billing errors and passing the billingn information to downstream systems thru
Rapid Response. The application will have a proxy feature thru which the users can designate
other employees to order items for them and also act on their behalf in the web order form
application.

Responsibilities:

• Integrated the Application with new Vendor (AIMS).

• Attended status meetings with Client Manager.Java V1.7, Spring, Hibernate, Prestro, SOAP Web Services, JavaScript, Platform CSS, jQuery, Ajax, and Oracle11g.

Tools PL/SQL Developer, Maven build tool, Tomcat, Perforce, SOAP UI, Eclipse
